ISNUMBER Function (DAX)

[Example](#) [See Also](#) [Send Feedback](#)

Checks whether a value is a number, and returns TRUE or FALSE.

Syntax

ISNUMBER(<value>)

Parameters

Term	Definition
value	The value you want to test.

Property Value/Return Value

TRUE if the value is numeric; otherwise FALSE.

Example

The following three samples show the behavior of ISNUMBER.

 [Copy Code](#)

```
//RETURNS: Is number
=IF(ISNUMBER(0), "Is number", "Is Not number")

//RETURNS: Is number
=IF(ISNUMBER(3.1E-1), "Is number", "Is Not number")

//RETURNS: Is Not number
=IF(ISNUMBER("123"), "Is number", "Is Not number")
```
